B&G ecocirc® Pump Wins Yet Another Award! Capturing Top Honors in Inaugural Plumbing Category

The Bell & Gossett ecocirc® domestic hot water circulator has done it again! Recognized for its energy-saving features and innovative design, the ecocirc® is one of ten products among thousands that will be on display at the world's largest HVACR exposition to be selected as an Innovation Award winner. ITT's achievement will be recognized at the 2011 AHR Expo to be held in Las Vegas January 31-February 2, 2011.

B&G Explains The Energy Independence and Security Act

For many, energy conservation has taken center stage as the topic of discussion. The impending Energy Independence and Security Act (EISA) helps the pump industry increase its effectiveness in energy consumption but there is still confusion in what the legislation affects. Bell & Gossett has supplied a bulletin to help clarify EISA's December 19, 2010 implementation date. [Click here](#) to read through the ITT EISA bulletin.

B&G Little Red School House® 2011 Q1 Schedule Released

Start the new year off on the right foot. Bell & Gossett's Little Red School House® has recently released their 2011 Quarter 1 schedule of training courses. The Q1 offered seminars will cover topics from Modern Hydronics Basic Seminar all the way up to the more involved Design Application course. To learn more about the B&G Little Red School House® class schedule [click here](#).
